

BigBlueButton Accessibility

Seneca Centre for Development of Open Technology

Why make things accessible?

Keep in mind that your users may have:

- Motor function impairment
- Visual impairment
- Hearing impairment
- Multiple impairments

Design accordingly!

Chat Module

Implemented:

- Keyboard navigation
- Input box focus
- Screen reader cooperation
- Audible alerts

Recording Playback

Uses ARIA (Accessible Rich Internet Applications)

Implemented:

- Thumbnail Labels
- Presentation Text
- Chat Messages

General Changes

Implemented:

- Resize and move windows
- Hotkey reference window
- Localised hotkeys

Planned:

- Tab order
- More hotkeys
- Modular accessibility

THANKS FOR LISTENING!
